EXPERIENCE

Company name under NDA, Full Remote — *Software Engineer*

SEP 2024 - PRESENT

Design and development of scalable back-end microservices using **Java** and **Spring Boot**, aimed at innovating and refactoring legacy systems based on monolithic architectures, as well as building new systems from scratch for public administrations and ministries. I actively participate in mentoring junior developers, supporting their technical growth and team integration through technical reviews and individual tests.

Digitouch Technologies, Catania — *Software Engineer*

JUL 2022 - AUG 2024

In the consulting sector, I have worked on a wide range of projects for prominent clients, including banks (Poste Italiane, Unipol) and public administrations and ministries (MIT — Ministry of Infrastructure and Transport, Sport e Salute). From developing new solutions to maintaining enterprise software, I have collaborated with major consulting companies such as DXC Technology and Deloitte as part of distributed teams.

STUDIES AND CERTIFICATIONS

Università di Catania, Catania — *Bachelor's degree in computer science with a grade of 110 / 110 & laude*

Opinno, Catania — Java *Masterclass*

SDI - Soluzioni d'impresa, Catania — *Business English*

PROJECTS

Progetto AnTeA (ISS)— *Anagrafe territoriale delle acque*

Design and development of BE MSs using Java and Spring Boot with EDA.

NSMA & PRMP (MIT)— *Portale dell'automobilista services*

Development of new features on Java and Spring Boot microservices using Agile methodology. Multinational collaboration and Quality Assurance.
